# ENC-816LP

## Shallow Enclosure for 8" Subwoofers & Speakers

### DESCRIPTION

**ENC-816LP** is the perfect solution for a shallow speaker enclosure that installs easily in walls or ceilings and provides superior performance for 8" subwoofers, 8" ceiling speakers and 6.5" 15-degree theater speakers. Carefully designed by custom install experts, it simplifies installation yet enables installers to deliver higher performance custom installations - without building custom boxes or enclosures on site.

The ENC-816LP is just 3-3/8" deep (86mm) and fits into 16" wide 2 x 4 construction. It also fits easily beneath, beside and behind furniture (with the **ENC-IRA8** In-Room Adaptor) and comes complete with all mounting accessories. It is solidly constructed with internal bracing and heavily glued seams and joints. Secure connections are assured thanks to the Gold-Plated, High-Tension Spring Terminals. The non-reflective finish allows ENC-816LP to hide effectively from view.

### FEATURES

- Sized to fit easily into 16" construction bays
- Shallow 3-3/8" depth fits inside wall construction
- Also fits easily beneath, beside and behind furniture
- Comes complete with all standard mounting accessories
- Internally braced and heavily glued seams and joints
- Gold-Plated, High-Tension Spring Terminals
- Non-reflective finish hides ENC-816LP effectively from view
